

Responsible Alcohol Management

Health through Participation

Over 6,500 Australians die each year from the effects of alcohol.

Safe and responsible drinking means drinking alcohol in a way that does not harm the drinker or others.

Your organisation should:

- provide low and non-alcoholic drinks at prices competitive with full-strength alcoholic drinks;
- provide water free of charge;
- ensure food is provided when alcohol is being served;
- ensure alcohol is not available to minors; and
- comply with Liquor Licensing Victorian regulations.

Some ideas to help you responsibly manage the serving of alcohol

- Adopt a Responsible Alcohol Management Policy
- Know your licensing requirements and ensure your staff members do also
- Provide alcohol-free events for your members and families
