

Warrnambool

LGA Profile

VicHealth Indicators Survey 2011 Results

This profile provides an overview of wellbeing in this LGA. It is designed to provide local governments with population health data to undertake comprehensive, evidence-based municipal public health and wellbeing planning.

Warrnambool highlights*

- Residents of the City of Warrnambool reported significantly greater wellbeing than the Victorian average. Residents gave their wellbeing an average score of 79.8 out of 100, compared with the state average of 77.5.
- Warrnambool residents were significantly less likely to feel rushed and pressed for time; only one-third of residents (33.2%) felt this way always or often, compared with the Victorian average (41.3%).
- A significantly greater proportion of Warrnambool residents (73.5%) shared a meal with their families at least five days a week, compared with the Victorian average (66.3%).
- Warrnambool residents were significantly more likely to volunteer at least once a month (49.6%) and to report some type of citizen engagement in the previous 12 months (63.1%), compared with state averages (34.3% and 50.5% respectively).
- Residents of Warrnambool were significantly more likely to make their own art or crafts; 45.3% reported making or creating art or crafts in the previous three months, compared with the state average (34.9%).
- While a significantly lower proportion of Warrnambool residents had internet access at home (81.6%), compared with the state average (88.8%), there was no significant difference in their use of social networking to organise spending time with friends and family.

* Significance has been calculated to the 95% level of probability. Significant difference is indicated when confidence intervals for an LGA estimate do not overlap with confidence intervals for the Victorian average. Not all statistically significant results are reported as 'highlights'. See chart over page for all indicators.

Data has been weighted by age and gender within each local government area (LGA). Crude rates, also known as non-standardised rates, are shown here to help inform localised planning. Crude rates are not appropriate for comparisons between individual LGAs, as estimates have not been age-standardised and differences may be due, at least in part, to differing age profiles. Significant differences shown in this document may be partly due to differences between the age profiles of the LGA and the Victorian population as a whole. Age-standardised data is available on request†.

The City of Warrnambool is located southwest of Melbourne and its most populous community, Warrnambool, is approximately 250 kilometres from Melbourne. The City of Warrnambool covers an area of roughly 120 square kilometres and has a population of about 33,000.

About the survey

The data comes from the VicHealth Indicators Survey 2011, which has a focus on social determinants of health. It complements other population health survey work conducted in Victoria. Data was collected through telephone interviews.

The survey was conducted in each of Victoria's 79 LGAs, with a total sample of 25,075 participants aged 18 and over.

Warrnambool indicator results

The chart below shows how the indicators of health and wellbeing for this LGA compare to the Victorian average. The LGA's result is shown as a circle. Significant difference (indicated by the circle's colour) was deemed to exist when confidence intervals for an LGA estimate did not overlap with confidence intervals for the Victorian average. Crude rates, also known as non-standardised rates, have been presented here to help inform localised planning. Crude rates are not appropriate for comparison between LGAs, as estimates have not been age-standardised and therefore differences may be due, at least in part, to differing age profiles. Values are percentages unless stated otherwise.

Indicator	% LGA	LGA estimate confidence interval	% Victoria	Victoria least favourable	Victoria Range	Victoria most favourable
Wellbeing						
Subjective wellbeing (range 0–100)	79.8	[78.3, 81.3]	77.5	73.7		82.5
Alcohol						
Purchased alcohol in the last 7 days	38.7	[32.1, 45.7]	36.3	54.4		20.7
7 day \$ spend on packaged liquor (of those purchasing) ⁺	48	[30, 66]	45	63		24
7 day \$ spend at a licensed premises (of those purchasing) ⁺	37	[20, 54]	45	129		13
Work, life and time						
Long commute (≥2 hours per day) [^]	No data		11.6	26.2		0
Inadequate sleep (<7 hours per weekday)	28.2	[22.4, 34.9]	31.5	44.1		18.8
Lack time for friends/family	24.5	[19.2, 30.8]	27.4	36.2		17.8
Time pressure	33.2	[27.1, 39.8]	41.3	53.8		26.5
Adequate work-life balance [^]	48.1	[39.4, 57.0]	53.1	37.6		69.5
Healthy eating and sedentary behaviour						
Shares a meal with family (≥ 5 days per week)	73.5	[67.5, 78.8]	66.3	54.7		81.1
Sedentary behaviour (sitting ≥7 hours per day)	28.2	[22.1, 35.1]	32.6	52.3		15.2
Daily soft drink consumption	10.3	[6.7, 15.5]	12.4	20.5		4.3
Green space and safety						
Visit to green space (≥ once per week)	50.5	[43.6, 57.3]	50.7	31.4		79.3
Perceptions of safety - walking alone during day	98.5	[96.4, 99.4]	97.0	89.6		100
Perceptions of safety - walking alone during night*	76.1	[69.3, 81.8]	70.3	45.2		95.4
Community engagement						
Volunteering (≥ once per month)*	49.6	[42.8, 56.5]	34.3	22.6		62.1
Participation in citizen engagement (in the last year)	63.1	[56.1, 69.6]	50.5	26.4		73.3
Arts and new media						
Attended arts activities or events (in the last 3 months)	57.6	[50.7, 64.2]	63.6	35.4		82.6
Made or created art or crafts (in the last 3 months)	45.3	[38.6, 52.3]	34.9	20.4		51.2
Internet access at home	81.6	[75.9, 86.2]	88.8	68.5		96.1
Social networking used to organise time with friends/family	28.1	[22.1, 35.1]	35.1	18.8		47.1
Social attitudes that influence health						
Community acceptance of diverse cultures	47.2	[40.2, 54.3]	50.6	28.3		78.0
Prepared to intervene in a situation of domestic violence	92.7	[89.0, 95.2]	93.1	87.9		97.0
Smoking policy						
Support for smoking ban in outside dining areas	67.2	[60.2, 73.5]	69.8	59.9		76.8

Legend

- LGA value significantly more favourable than Victorian average
- LGA value significantly less favourable than Victorian average
- LGA value not significantly different from Victorian average
- Sampling variability high, use with caution (relative standard error 25–50%)
- | Victorian average
- ⁺ Reported as \$ for those purchasing this type of alcohol

- Range of results across all LGAs
- [^] Question only asked of participants who were employed
- ^{*} Cannot be compared to 2008 Victorian Population Health Survey as data was not collected in the same manner
- No data Relative standard error above 50%, estimate not reported
- Details of questions can be found at: www.vichealth.vic.gov.au/indicators
