

Whittlesea

LGA Profile

VicHealth Indicators Survey 2011 Results

This profile provides an overview of wellbeing in this LGA. It is designed to provide local governments with population health data to undertake comprehensive, evidence-based municipal public health and wellbeing planning.

Whittlesea highlights*

- Residents of the City of Whittlesea had a wellbeing score consistent with the Victorian average; 76.1 out of 100, compared with the state average of 77.5.
- Whittlesea residents were significantly less likely to purchase alcohol; only one in five residents (20.7%) reported buying alcohol in the previous week, compared with the state average (36.3%).
- More than two-thirds of Whittlesea residents (66.9%) shared a meal with their families at least five days a week, consistent with the Victorian average (66.3%).
- While residents of Whittlesea were significantly less likely to report citizen engagement in the previous 12 months (36.9%), compared with the Victorian average (50.5%), more than one-quarter (28.1%) volunteered at least once a month. This is in line with the state average (34.3%).
- Whittlesea residents were significantly less likely to have attended arts activities or events in the previous three months (53.1%), compared with the state average (63.6%). However, there was no significant difference in the proportion of residents who made or created their own art or crafts in that same timeframe (Whittlesea 31.0%; Victoria 34.9%).

* Significance has been calculated to the 95% level of probability. Significant difference is indicated when confidence intervals for an LGA estimate do not overlap with confidence intervals for the Victorian average. Not all statistically significant results are reported as 'highlights'. See chart over page for all indicators.

Data has been weighted by age and gender within each local government area (LGA). Crude rates, also known as non-standardised rates, are shown here to help inform localised planning. Crude rates are not appropriate for comparisons between individual LGAs, as estimates have not been age-standardised and differences may be due, at least in part, to differing age profiles. Significant differences shown in this document may be partly due to differences between the age profiles of the LGA and the Victorian population as a whole. Age-standardised data is available on request†.

The City of Whittlesea is located north of Melbourne and its most populous community, Mill Park, is approximately 22 kilometres from Melbourne. Whittlesea covers an area of roughly 490 square kilometres and has a population of about 150,000.

About the survey

The data comes from the VicHealth Indicators Survey 2011, which has a focus on social determinants of health. It complements other population health survey work conducted in Victoria. Data was collected through telephone interviews.

The survey was conducted in each of Victoria's 79 LGAs, with a total sample of 25,075 participants aged 18 and over.

Whittlesea indicator results

The chart below shows how the indicators of health and wellbeing for this LGA compare to the Victorian average. The LGA's result is shown as a circle. Significant difference (indicated by the circle's colour) was deemed to exist when confidence intervals for an LGA estimate did not overlap with confidence intervals for the Victorian average. Crude rates, also known as non-standardised rates, have been presented here to help inform localised planning. Crude rates are not appropriate for comparison between LGAs, as estimates have not been age-standardised and therefore differences may be due, at least in part, to differing age profiles. Values are percentages unless stated otherwise.

Indicator	% LGA	LGA estimate confidence interval	% Victoria	Victoria least favourable	Victoria Range	Victoria most favourable
Wellbeing						
Subjective wellbeing (range 0–100)	76.1	[73.8, 78.5]	77.5	73.7		82.5
Alcohol						
Purchased alcohol in the last 7 days	20.7	[15.6, 26.8]	36.3	54.4		20.7
7 day \$ spend on packaged liquor (of those purchasing) ⁺	39	[30, 49]	45	63		24
7 day \$ spend at a licensed premises (of those purchasing) ⁺	53	[31, 75]	45	129		13
Work, life and time						
Long commute (≥2 hours per day) [^]	17.8	[12.1, 25.3]	11.6	26.2		0
Inadequate sleep (<7 hours per weekday)	41.9	[35.3, 48.9]	31.5	44.1		18.8
Lack time for friends/family	36.2	[29.6, 43.5]	27.4	36.2		17.8
Time pressure	42.7	[36.1, 49.5]	41.3	53.8		26.5
Adequate work-life balance [^]	50.0	[41.2, 58.8]	53.1	37.6		69.5
Healthy eating and sedentary behaviour						
Shares a meal with family (≥ 5 days per week)	66.9	[59.9, 73.3]	66.3	54.7		81.1
Sedentary behaviour (sitting ≥7 hours per day)	29.0	[23.1, 35.8]	32.6	52.3		15.2
Daily soft drink consumption	13.8	[9.5, 19.5]	12.4	20.5		4.3
Green space and safety						
Visit to green space (≥ once per week)	31.4	[25.6, 37.9]	50.7	31.4		79.3
Perceptions of safety - walking alone during day	93.6	[89.0, 96.3]	97.0	89.6		100
Perceptions of safety - walking alone during night*	68.4	[61.3, 74.6]	70.3	45.2		95.4
Community engagement						
Volunteering (≥ once per month)*	28.1	[22.2, 34.8]	34.3	22.6		62.1
Participation in citizen engagement (in the last year)	36.9	[30.5, 43.8]	50.5	26.4		73.3
Arts and new media						
Attended arts activities or events (in the last 3 months)	53.1	[46.3, 59.8]	63.6	35.4		82.6
Made or created art or crafts (in the last 3 months)	31.0	[25.0, 37.8]	34.9	20.4		51.2
Internet access at home	85.4	[80.7, 89.1]	88.8	68.5		96.1
Social networking used to organise time with friends/family	36.8	[30.2, 44.0]	35.1	18.8		47.1
Social attitudes that influence health						
Community acceptance of diverse cultures	41.9	[35.2, 48.8]	50.6	28.3		78.0
Prepared to intervene in a situation of domestic violence	90.3	[86.2, 93.2]	93.1	87.9		97.0
Smoking policy						
Support for smoking ban in outside dining areas	67.7	[60.6, 74.0]	69.8	59.9		76.8

Legend

- LGA value significantly more favourable than Victorian average
- LGA value significantly less favourable than Victorian average
- LGA value not significantly different from Victorian average
- Sampling variability high, use with caution (relative standard error 25–50%)
- | Victorian average
- ⁺ Reported as \$ for those purchasing this type of alcohol

- Range of results across all LGAs
- [^] Question only asked of participants who were employed
- ^{*} Cannot be compared to 2008 Victorian Population Health Survey as data was not collected in the same manner
- No data Relative standard error above 50%, estimate not reported
- Details of questions can be found at: www.vichealth.vic.gov.au/indicators
