

AFL – South East

We recognise that tobacco is a major cause of preventable death and disease. It denies people the right to live and work in a safe and healthy environment. It is particularly harmful to children, and action is needed to reduce the harm caused by smoking and second hand smoke.

Protecting the health of our community is a high priority for our organisation, and we commit to supporting and implementing the principals of this smoke free charter.

We are committed to:

- Reducing the number of people who smoke
- Protecting our community from the damaging effects of secondhand smoke
- Supporting our community to access quit smoking support services
