

The Starfish Nipper program at your lifesaving club

With a Starfish Nipper program, you're helping to foster a culture of inclusiveness and diversity at your lifesaving club in the years ahead.

The Starfish Nipper program was developed independently in 2011 at Anglesea Surf Lifesaving Club by volunteer lifesaver Janet Jones, with support and guidance from the Anglesea Club.

The program educates and engages young people with special needs.

Focusing on beach and surf skills, the goal is to build confidence for those with special needs in the beach environment.

The Starfish Nipper program is a great way to promote lifesaving, engage members of the community and most importantly to create opportunities for those with special needs.

Start a starfish nipper program at your club today!

Starfish
NIPPERS
Founded in 2009 by Anglesea SES

The program caters for numerous forms of special needs, concentrating on their abilities and not their disabilities.

Starfish Nippers is family oriented and is included in the traditional Nipper program.

This means that families can have all of their children involved with one club Nipper program. Every Starfish Nipper requires a parent or guardian present at each session.

Starfish Nippers have a dedicated volunteer to ensure they become familiar with their trainer and to maintain consistency as they are guided through the program.

Register for the Starfish Nipper program now at www.starfishnippers.com.au and we'll guide you from there!
